

## INESFLY BODY 35

### DESCRIPTION

INESFLY BODY is an insect repellent for human use offering protection for a period of up to 8 hours against mosquitos and ticks . The active ingredient IR3535® has been successfully used in insect repellents for over 30 years.

IR3535®'s efficacy is also **confirmed by the recommendations of official bodies** such as the CDC (Centers for Disease Control) and EPA (Environmental Protection Agency). According to the World Health Organization (WHO), protection against mosquito bites is key to preventing insect-borne diseases.

### COMPOSITION

Alcohol, Aqua, Ethyl Butylacetylaminopropionate (IR 3535) 20%, PEG-8, PEG-32, VP/VA Copolymer, Polysorbate 20, PPG-15 Stearyl Ether.

### USES

Apply and spread well on skin areas exposed to potential bites. Do not apply over cuts, wounds, freshly shaven or irritated skin. Do not allow children to handle this product, and do not apply to children's hands. When using on children, apply to your own hands and then put it on the child. **TO APPLY TO FACE:** Do not spray directly to the face. Spray palm of hand and rub on. **FOR CONTINUED PROTECTION:** reapply about every 8 hours or sooner if effectiveness is diminished; not to exceed 3 applications per day. The employment guidelines contained on the label must be followed. However, in areas where there is a risk of insect-borne disease and in those cases where extreme conditions so warrant, the preventive measures communicated by health authorities will be met.

### RECOMMENDATIONS

External use. Do not ingest or inhale. Easily flammable. Keep out of children's reach and away from food and drinks. Do not use on people sensitive to its components. May cause sensitisation with skin contact. Avoid contact with eyes, mucous membranes, sensitive or diseased skin and wounds. In case of contact, rinse immediately with plenty water.

Do not spray directly on the face and apply the product by hand. In case of ingestion, seek medical advice immediately and show the bottle or label. To avoid risks to people and the environment, comply with the instructions for use.

### TOXICOLOGICAL CLASSIFICATION

Category 5 by GHS (Global Harminized System).
