

INESPALM COATING

DESCRIPTION

INESPALM COATING with its innovative technology based on polymeric microcapsules allows a slow release of the insecticide, giving the product a high persistence and very low toxicity.

USES

It allows the control of all kinds of arthropods and pests in ornamental plants, specially to prevent palm weevil attack.

COMPOSITION

Deltamethrin 0.5%

USE INSTRUCTIONS

For the preventive control of red palm weevil apply immediately after pruning in the cutting area and also in the bud.

For the control of ants apply one band of 20 cm on tree base.

Prior to application it is necessary to remove all existing dirt.

INESPALM is a Ready to Use (RTU) product. Apply one coat of INESPALM using following techniques: Brush or roller. Gun or spraying equipment (airless)

Do not apply at temperatures below 5°C or surfaces exposed to strong sunlight.

It is transparent after dry.

RECOMMENDATIONS

Before using the product, read carefully the label.

Shake the product until mixture is homogeneous.

Avoid direct contact with skin.

Use appropriate protective equipment: gloves, mask and goggles.

TOXICOLOGICAL CLASSIFICATION

Category 4 by GHS (Global Harminized System).

REGISTERS

To apply for registration in your country, please consult with the registration department of Inesfly Corporation SL.

Maximun Persistence

Product scientifically tested with high residual power.

Patent Dr. Pilar Mateo

TECHNICAL SPECIFICATIONS

Appearance: liquid and whitish.

Drying: 1 hour.

Recoatable: 3-5 hours.

Density: 1'10.

Performance: 200-400 ml/palm.

Cleaning: with water.

Conservation: Up to two years in unopened original packing.

PACKAGING

Jerrican 5 litres.
